

PROVIDING MORE VALUE TO YOUR SENSOR PURCHASES

Does your sensor assembly require a connector?

Provide us with a connector specification/part number and we will add the connector to the sensor. This is available on low volume qts at very reasonable pricing.

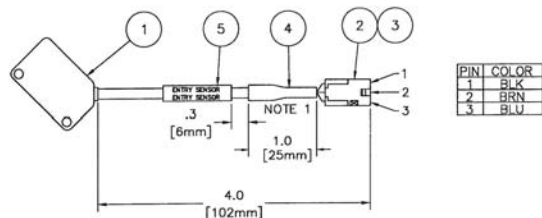

Do you need cable prep and custom part number added to the sensor?

We will prep the cable and add custom part number or drawing number to the sensor.

Simplify your supply chain and save time

Provide us with your specification and we will deliver your solutions how and when you want them.

Do you have a need for customized kits?

We will provide customized kitting that could include packaging the customized sensor with wire ties, custom legend plates, custom mounting brackets, or pre-programming menu driven sensors.

Example of a turn key solution wiring and pre-programming our laser sensor and panel meter.
